666 and Base Sixty Math – Part 3 Pyramids, the Cosmos, Mysticism, and the Tower of Babel

Pyramids, Cosmos, Mysticism – Audio Only Link

PYRAMIDS, THE COSMOS, MYSTICISM, AND THE TOWER OF BABEL

Base 60 math was used by the mathematically advanced antediluvian world. This is a fact and it was ***not*** an arbitrary decision by our ancestors. In the first part of this post, I will prove to you that the underlying mathematics and geometry of the universe are rooted and grounded in the number 6.

Just to review what I covered in previous posts about our English measuring system: We start with one inch (1). A span is 6″ (6×1). A foot is 2 spans or 12″ (6×2). A yard is 36″ or 3 feet or 6 spans (6×6). A mile is 5280 feet which is 60 feet times 88. We still use the units of time from the base 60 system to this day also. 60 seconds in a minute, 60 minutes in an hour, 24 hours in a day (6×4), 30 days in a month (6×5), and previously there were exactly 360 days (60×6) in a year. The 360-day year was the reason the circle was determined to be divided into 360 degrees, 1 degree for each day of the orbit of the earth, 360 degrees total in a circle.

Now to prove that those increments were not decided upon arbitrarily let's examine the measurement of the earth, moon, and sun. You will see the creator of the universe used that scale, and our ancestors derived the measurements mathematically from the creation. As we get further into this you will be astounded when you realize that it does not matter whether you use the English

system of measuring, or the French metric system, or the ancient cubit. They all work the same!

The radius of the earth is 3960 miles. That is 60×66 miles.

The diameter of the earth is 7920 miles. That is 60x66x2 miles.

The diameter of the moon is 2160 miles. That is 60x6x6 miles.

The radius of the moon is 1080 miles. That is 60x6x3 miles.

The radius of the sun is 432,000 miles. That is 60x60x60x2 miles.

The diameter of the sun is 864,000 miles. That is 60x60x60x4 miles.

Mankind had no say in the size of the earth, moon, and sun. The scale was set by God, we just calculated the increments using base 60 math. Our ancestors, who lived before the flood, with their keen intellect and long lifespans were far more advanced in mathematics than we are today.

The universe itself reveals multiples of 6 and 60 in its design. The math of the universe also declares 7 as its architect. There are countless examples in the physical universe but I will use one of the most well-known, investigated, and documented examples in the world, the pyramids of Giza.

Let's look at the Great Pyramid of Giza. One of the oldest works of architecture and engineering in the world, yet it contains no less than 10 highly advanced mathematic constants in the design. Some of these constants we just rediscovered in the 20th century. I say *rediscovered* because our ancestors were intimately acquainted with these mathematical constants. We are just now, some 5000 years later, figuring them out. We will look at these mathematic constants first, after that we will look at the scale of the building as an ***exact*** statement of the measurements of the earth.

The following mathematic constants are contained in the Great Pyramid of Giza.

			1.41421 35623 73095 04880 Square root of 2 First published by Hippasus around 500 BCE
	1.73205 08075 68877 29352	Theodorus Constant	Theodorus of Cyrene 399 BCE

			2.23606 79774 99789 69640 Heron of Alexandria, first person to describe a method to calculate 1st century CE

√6 2.4494897427831780 98... Sq.root of 6, Heron of Alexandria again expressed a method in the 1st century CE

			3.14159 26535 89793 23846 Pi Ratio of a circle’s circumference to its diameter. Archimedes 287 -212 BCE
ϕ	1.618033988749894…	Phi (1 +√5)/2	The Golden Ratio Michael Mastlin 1597 CE

	2.71828 18284 59045 23536	Euler’s number first expressed by Jacob Beanoulli in 1683 CE

0.57721 56649 01532 86060 Euler’s Constant Leonard Euler circa 1720 –

1730 CE

T 1.83928 67552 14161 13255 Tribonacci Constant by N. Agronomof in 1914 CE

	1.90216 05831 04 Brun's Constant First published by Viggo Brun 1919 CE

In the short video below by Alan Green of tobeornottobe.org (that is *To be or not to be* all one word), Alan shows you all of these math constants, plus a couple more, in the Great Pyramid. Alan has done a marvelous job of making difficult material easy to understand. Please watch this video you will be glad you did! Also, if you want more on this subject please visit Alan's website at

tobeornottobe.org

https://www.yeetfire.com/wp-content/uploads/2022/09/Great-Pyramids-Astounding-Math-Constants-Revised-Cut-Video.m4v

Whether the pyramids of Giza are 4500 years old (the youngest accepted date of construction) or if they are even older, the mathematics inherent in the design is sophisticated. Are they just coincidences or did the architect have advanced mathematical knowledge? The next video will prove the architect knew what he was building.

The Great Pyramid of Giza is a mathematical representation of the earth on a scale of 1:43,200. Please note that 43,200 is a multiple of 60 (60x60x12 or 60^2x12). Also please understand the longitude and latitude system we use today is a base 60 system. The GPS we use to navigate with to this day is the same system the builders of the Great Pyramid of Giza used to scale the pyramid to **exactly** 1/4 of one minute of latitude and longitude at the earth's equator. In other words, if you take 15 seconds of latitude at the earth's equator that measurement east to west is **exactly** the same as the southern side (east to west) length of the pyramid. If you take 15 seconds of longitude at the earth's equator that measurement north to south is **exactly** the same as the east and west side length (running north to south) of the pyramid. The scale is so precise that it is not a perfect rectangle because longitudinal lines converge as you go north so the north side of the pyramid is slightly shorter than the south side by **exactly** the proportions you would expect. There is no doubt that the builders of the pyramids were using Base 60 mathematics.

The following video will provide amazing information about the earth contained in the design of the Great Pyramid of Giza.

https://www.yeetfire.com/wp-content/uploads/2022/09/Randy-Carlson-The-Great-Pyramid-Revised-Video.m4v

Here are a few more amazing facts about the 1:43,200 (base 60) scale of the

Pyramid of Giza.

https://www.yeetfire.com/wp-content/uploads/2022/09/The-Great-Pyramid-is-a-Scale-of-the-Earth.mp4

This next video on the pyramids will begin to show the relationship between 7 and 6. My hope is you will begin to see a mathematical relationship between the creator (7) and the creation (6). It is a key to understanding prophetic scripture as well as idolatry. You will not get all that (or any of that) from the video, but it is there. Just enjoy the incredible geometry and remember the radius of the circle in the video is 120 (60×2) and the diameter is of course 240 (60×4).

This video titled *Geometric Solution to the 3 pyramids of Giza and the hidden Hebrew text* by Varda Sarnat has been edited to play only the part relevant to this post. To view the full unedited video on Youtube please click this link. https://youtu.be/wEK0cLd5LPU

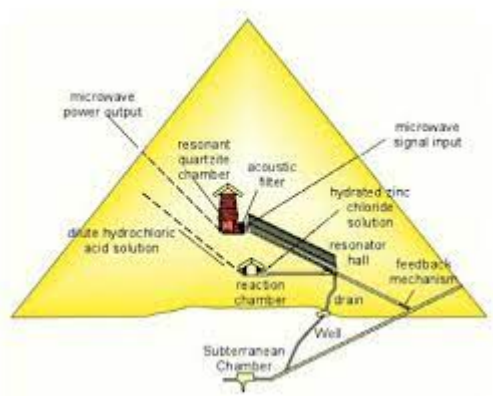

https://www.yeetfire.com/wp-content/uploads/2022/09/Giza-Pyramids-Ultimate-Geometric-solution-in-the-Hebrew-Bible_Trim.mp4

Finally, I want to share with you the purpose of the Great Pyramid.

The Great Pyramid of Giza is the oldest existing remnant of the highly advanced antediluvian human civilization. As I have stated many times in these posts, the world before the flood was, in many ways, more advanced in physics and mathematics than we are today. The Great Pyramid of Giza is undeniable proof.

The Great Pyramid of Giza has been reverse-engineered and proven to have been a clean energy power plant. Before its degradation, the pyramid would have

produced a huge amount of electrical energy which would have been transmitted wirelessly throughout the region as a free energy source. Tesla's **Wardenclyffe Tower** was a primitive attempt at exactly the same type of energy transmission. Sadly, free clean energy is not something the wealthy and powerful of this day and age will allow.

If you are interested you can find the proof originally discovered and published by Christopher Dunn on YouTube or in books he has published. His original book was published in the late 80s. Since then many, many engineers have reached similar conclusions.

Let's briefly summarize. We see that the God-ordained radius and diameter of the sun, moon, and earth are multiples of 60. We see that the Great Pyramid of Giza is an exact model of the earth's dimensions on a scale of 1:43,200 ($1:60^2$x6x2) whose geometry contains at least 12 mathematical constants and the dimensions of all three pyramids of Giza can be found from a circle with a diameter of 240 (60×4) divided into 7 equal parts and then joining the apexes of the heptagon. To say this is all coincidence would be unrealistic. Clearly, the relationship between the number six to creation is obvious. It is also obvious that the builders of the Great Pyramid of Giza were using base 60 math. It is also obvious that the science involved in the pyramid's design and construction was highly advanced and of antediluvian origin. Finally, the relationship between the numbers 6 and 7 is beginning to become apparent. This brings me to the topic of sacred geometry.

Part 2: From this point forward I will show you the relationship between base 60 math and the infamous 666.

The Urban Dictionary's definition of sacred geometry is, *The underlying geometry of nature.*

Nature is the word people use when they don't want to give God the credit he deserves for creation itself and the divine order that the creation maintains. The origin of the word nature is most likely from the Egyptian word neter which was their common word for god. It seems to me to be poetic justice that the word people want to substitute for god is actually the word god. (ok, I got that off my chest)

As we move into what is called *Sacred* Geometry it is important to note that people are now placing a ***spiritual value*** on the geometry observed throughout creation. We are now leaving the purely mathematical and entering into the meta-physical.

There are countless websites on this topic. It is indeed a rabbit hole that I have no desire to explore. I add the topic to this post because it is a prime example of how people think there is a 'secret' way to obtain health, wealth, long life, peace, tranquility, happiness, fame, power, etc. without simply kneeling before the God who created all things.

The origins of Sacred Geometry date back at least to the writings of Plato and Pythagoras, probably earlier. In the following two paragraphs, I have quoted the website *Destination Deluxe* as a brief explanation of what people believe.

WHAT IS SACRED GEOMETRY?

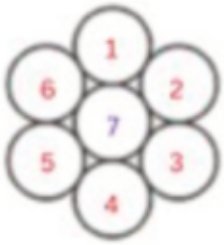

Many teachings have described Sacred Geometry as the blueprint of creation and the genesis, the origin of all form. Sacred geometry is considered an ancient

science that explores and explains the energy patterns that create and unify all things and reveals the precise way that the energy of creation organizes itself. It is said that every natural pattern of growth or movement comes back to one or more geometric shapes.

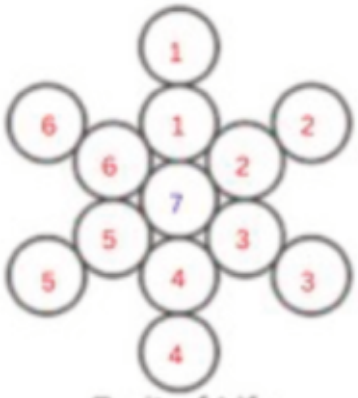

The molecules of our DNA, the cornea of our eye, snowflakes, flower petals, crystals, a shell, the stars, the galaxy we spiral within, the air we breathe, and all life forms are created out of geometric codes.

Below you can see the principal shapes of Sacred Geometry. All of these geometric figures are based on the number 6 with the 7th figure either being the center of the object or surrounding the object. Again, this reinforces the idea that 6 is the number of the finished creation and 7 signifies the Creator.

Once you start down the rabbit hole of Sacred Geometry you will be exposed to more and more spiritual aspects and delve deeper and deeper into mysticism.

It is all a human endeavor to discover the 'secret' to reaching and connecting directly with the spiritual universe.

A. Such is the desire of all secret societies.

Freemasonry has 36 degrees (6×6). Each degree is a secret rite of passage.

The Rosicrucian Order's occult sacred **tree of life** is the symbol above.

The Illuminati promise riches, wealth, fame, and power from the realm of their 666 temple.

You get the idea. People align themselves with others with the promise of finding a secret way to fulfill their earthly lives. All cults promise enlightenment, the ability to become more like a god or The God, and the discovery of some hidden truth. Every enticement is a spin on the original temptation in the Garden of Eden, a hidden, forbidden, or secret shortcut to getting what you want.

B. Such is the source of every form of magic.

Magic (black or white) according to the Encyclopedia Britannica includes divination, astrology, incantations, alchemy, sorcery, spirit mediation, and necromancy. All of these forms of magic can be traced to the teaching of the fallen angels as detailed in the book of Enoch. All involve communication with the spirit realm. Some are just revelatory information and others involve invoking action from the spirit realm.

If you are involved in any of these things I urge you to repent. The spirits are not

your friends, they hate you and want to use you and finally destroy you. That being said, the number 6 and its multiples are prominent in magic.

C. Such was the goal of the builders of the tower of Babel.

Once you understand what was going on at the tower of Babel everything comes together.

First, let's look at the written record concerning the tower of Babel, *The Bible*, Genesis 10 and *The Book of Jubilees*, chapter 10.

(Gen 11:1-9 [KJV])
And the whole earth was of one language, and of one speech. And it came to pass, as they journeyed from the east, that they found a plain in the land of Shinar; and they dwelt there. And they said one to another, Go to, let us make brick, and burn them throughly. And they had brick for stone, and slime had they for morter. And they said, Go to, let us build us a city and a tower, whose top may reach unto heaven; and let us make us a name, lest we be scattered abroad upon the face of the whole earth. And the LORD came down to see the city and the tower, which the children of men builder. And the LORD said, Behold, the people is one, and they have all one language; and this they begin to do: and now nothing will be restrained from them, which they have imagined to do. Go to, let us go down, and there confound their language, that they may not understand one another's speech. So the LORD scattered them abroad from thence upon the face of all the earth: and they left off to build the city. Therefore is the name of it called Babel; because the LORD did there confound the language of all the earth: and from thence did the LORD scatter them abroad upon the face of all the earth.

Jubilees 10:18-27

And in the three and thirtieth jubilee, in the first year in the second week, Peleg took to himself a wife, whose name was Lomna the daughter of Sina'ar, and she bare him a son in the fourth year of this week, and he called his name Reu; for he said: 'Behold the children of men have become evil through the wicked purpose of

building for themselves a city and a tower in the land of Shinar. For they departed from the land of Ararat eastward to Shinar; for in his days they built the city and the tower, saying, 'Go to, let us ascend thereby into heaven. And they began to build, and in the fourth week they made brick with fire, and the bricks served them for stone, and the clay with which they cemented them together was asphalt which comes out of the sea, and out of the fountains of water in the land of Shinar. And they built it: forty and three years [1645-1688 A.M.] were they building it; its breadth was 203 bricks, and the height (of a brick) was the third of one; its height amounted to 5433 cubits and 2 palms, and (the extent of one wall was) thirteen stades (and of the other thirty stades). And the Lord our God said unto us: Behold, they are one people, and (this) they begin to do, and now nothing will be withholden from them. Go to, let us go down and confound their language, that they may not understand one another's speech, and they may be dispersed into cities and nations, and one purpose will no longer abide with them till the day of judgment.' And the Lord descended, and we descended with him to see the city and the tower which the children of men had built. And he confounded their language, and they no longer understood one another's speech, and they ceased then to build the city and the tower. For this reason the whole land of Shinar is called Babel, because the Lord did there confound all the language of the children of men, and from thence they were dispersed into their cities, each according to his language and his nation. And the Lord sent a mighty wind against the tower and overthrew it upon the earth, and behold it was between Asshur and Babylon in the land of Shinar, and they called its name 'Overthrow'. In the fourth week in the first year [1688 A.M.] in the beginning thereof in the four and thirtieth jubilee, were they dispersed from the land of Shinar.

Brick for stone and slime for mortar. Nimrod, Ham's grandson, is the one most credited for being the leader of building the city and the tower. Just two generations removed from the scientifically and mathematically advanced civilization destroyed in the flood, they clearly want to rebuild the technology.

The stone age – what our educators want to describe to us as a primitive time in our history – was highly advanced.

No need for steel or concrete, they could move, shape and utilize precision-cut stone to build and power a highly advanced civilization. They understood the utilization of frequency, harmonics, chemistry, energy production, and transmission to the nth degree. The knowledge of the past was brought through the flood in the minds of the survivors and they taught their children and grandchildren just as we would today if we survived such a calamity.

The problem with starting over is they no longer have the tech to cut, move and shape stone. The solution, let's make **brick for stone.** They no longer have the tech for precision cutting nor the tech to soften stone to make precision fittings. The solution, let's use **slime for mortar**.

Building a city makes perfect sense, but why a tower *whose top may reach unto heaven*, as stated in Genesis? Or why build a tower *to ascend thereby into heaven* as stated in Jubilees? What tech are they trying to reconstruct? These are the grandchildren of the survivors of the flood. What the heck do they need with a tower of all the possible things they could construct? And furthermore, why would God be opposed to it?

Some people have proposed that the tower was built in case of another flood. I find that unlikely. First of all, they have a perfectly good ark sitting on top of Mt Ararat that has already proven itself as a viable solution to a flood. If capacity is a concern, just build more arks. The tower would only provide safety to the few that could make it to the top and that is assuming they intend to build a tower that is higher than any mountain on earth seeing that all the mountains were under water during the flood.

Here is what we think we know. Most researchers of the tower have agreed that it was most likely a ziggurat. There are ziggurats all over Mesopotamia, the tower of Babel would have been the first.

Ziggurat of Ur built around 2000 bce

According to Jubilees the tower base was 13 stades (13×606.9ft = 7889.7 ft) by 30 stades (30×606.9ft = 18207ft) or roughly 1.5 miles by 3.5 miles. The height was 5433 cubits and 2 palms or approximately 8150 feet, roughly 1.5 miles high.

Burj Khalifa

The tower of Babel would have been about three times taller than the Burj Khalifa, currently the tallest building in the world.

Forty-three years under construction, from the dimensions given you get an appreciation of the scale of the project and the will of the builders. These were serious people with serious goals in mind. Their stated goals were A. to make a name for themselves, B. to not be scattered throughout the earth, and C. to build a tower by which they could ascend to heaven, the dwelling place of God, at will.

The Akkadian name of the city and tower which we refer to as Babel was Babilim. Babilim in Akkadian means the gate of the gods. The city was actually called *The City of the Gate of the Gods.* The tower was actually called *The Tower of the Gate of the Gods*. The dwellers of the city would have been the gatekeepers of the city and the tower of the gateway to the gods. After the intervention of God and the confusion of languages, they changed the name to Babel which means confusion.

It was a play on words.

Their first goal was to make a name for themselves, *Gatekeepers of the Gateway to the Gods*. That would have made them de facto priests of God. Their second goal was to not be scattered throughout the earth. They wanted to be set apart from the rest of the earth, to be special, not common. Again, a **manmade priesthood** always places itself in an elevated position above the common people. And their final goal was to be able to ascend into the presence of God and descend again at will, i.e., to be like God.

As far as the actual technology of the tower, I have little to go on. How they intended to reach heaven or ascend thereby into heaven utilizing the tower is something I can only speculate on at this time. The word ziggurat means pinnacle or mountain top. The 200 angels who invaded mankind originally came down upon Mt. Hermon. This likely spawned the idea that the gods dwell on mountaintops. Mythology is rich with that tradition. Because the plethora of pyramids around the world were likely ancient power sources utilizing the earth's frequency, harmonics, chemistry, and physics one could speculate that the enormous structure was intended to produce some kind of amplified wave but to what end I do not know. The term 'reach' heaven does not necessarily mean physically, we reach each other by phone all the time. However, since they were using manmade bricks and slime for mortar I find it doubtful that any high-tech purpose was intended.

Three things we know for certain.

First, their education came from their parents and grandparents. The only education their parents and grandparents would have known came from the world before the flood. Consequently, we see them attempting to rebuild a society based on stone buildings, i.e., brick for stone, and slime for mortar.

Secondly, they truly believe they can reach heaven, where they believe the gods reside, by building an enormous tower.

Thirdly, they do not believe they need permission from any god to do what they have the will to do.

As I said earlier, sacred geometry, secret societies, mysticism, magic, or building the tower of Babel…

It is all a human endeavor to discover the 'secret' to reaching and connecting directly with the spiritual universe.

Here is where it all comes together. What is about to happen at the tower of Babel will set the world on a collision course with the creature commonly called the AntiChrist. Let's take a look at that scripture in Revelations one more time.

(Rev 13:18 [KJV])
Here is wisdom. Let him that hath understanding count the number of the beast: for it is the number of a man; and his number is Six hundred threescore and six.

666. It could have been any number, except any number would not explain who he is. A name is more than just a moniker. This name is a description of the embodiment of rebellion against God. It started with Adam and Eve, it was helped along by the angels who also rebelled against God, and it culminated with the destruction of mankind in a worldwide flood.

Here is one thing you really need to understand. God states that His decision to wipe out all human life on earth was because the **heart of man** was only on evil continually. Mankind had become so ungodly at the

time of the flood that there was actually only one (1) man on the entire planet earth that God did not want to kill. God spared Noah's family for Noah's sake, not because they were righteous. That is God's character. It is clearly seen in the day before the destruction of Sodom and Gomorrah in the conversation He had with Abraham. God would not destroy the righteous with the wicked. Lot, his wife, and two daughters were spared. Only Lot was a righteous man, his wife and daughters were not. Some preachers like to say that now, this day and age, is comparable to the days of Noah. They had better hope not. The idea that there will be a pre-tribulation rapture is nothing more than a fairytale. They don't understand the scriptures at all. I will explain everything in my section on what the bible really says, God willing.

Now, back to the explanation of why 666 is a reference to base 60 math.

The universe and everything in it was created in six days. Man, Adam, was created on the sixth day. The physical universe and everything in it, the sun, moon, stars, earth, life on earth, etc. were created using the numbers 1,2,3,4,5, and 6. Base 60 math works perfectly in the physical universe. Base 60 math was the mathematics of the antediluvian world. Base 60 math was the math that the survivors of the flood taught their offspring. Base 60 math will even survive the coming confusion of languages at the tower of Babel to those who remain in Mesopotamia. The rest of the survivors that are scattered throughout the earth will eventually adopt another system, base 10.

God comes down to see what the children of men are doing at Babel.

And the Lord our God said unto us: Behold, they are one people, and (this) they begin to do, and now nothing will be withholden from them. Go to, let us go down and confound their language, that they may not understand one another's speech, and ***they may be dispersed into cities and nations,*** *and one purpose will no longer abide with them* ***till the day of judgment.***'

God confuses the language of the people so they could not communicate with each other. They break up into smaller groups of people who can understand each other and begin to move apart.

This was the beginning of the age of the gentiles (nations, the word gentile means nation).

The man of sin, the antichrist, appears at the time of the judgment of the gentiles (nations) referred to in the scripture above as the day of judgment. This is the time of Jacob's trouble, the valley of Jehosaphat (Jehosaphat means God's judgment, literally, Yahuah has judged). This is not the end of the world, it is not even the end of the gentiles or the end of individual nations. It is the day of judgment of the nations that began at the tower of Babel.

The time of Jacob's trouble prophetically spoken of in Jeremiah chapter 30 corresponds to the time of the Beast and the False Prophet, the judgment of the gentiles, and the beginning of to kingdom of God on the earth. The three events come to pass in a single generation.

I will write a post covering these events in detail, but for now, I will introduce you to a few of the scriptures so you can see the relevance of those events to this post.

(Jer 30:4-7 [KJV])
And these are the words that the LORD spake concerning Israel and concerning Judah. For thus saith the LORD; We have heard a voice of trembling, of fear, and not of peace. Ask ye now, and see whether a man doth travail with child? wherefore do I see every man with his hands on his loins, as a woman in travail, and all faces are turned into paleness? Alas! for that day is great, so that none is

like it: it is even the time of Jacob's trouble; but he shall be saved out of it.

(Matt 24:7 [KJV])
***For nation shall rise against nation, and kingdom against kingdom**: and there shall be famines, and pestilences, and earthquakes, in divers places.*

(Matt 24:15-22 [KJV])
*When ye therefore shall see the abomination of desolation, spoken of by Daniel the prophet, stand in the holy place, (whoso readeth, let him understand:) Then let them which be in Judaea flee into the mountains: Let him which is on the housetop not come down to take any thing out of his house: Neither let him which is in the field return back to take his clothes. And woe unto them that are with child, and to them that give suck in those days! But pray ye that your flight be not in the winter, neither on the sabbath day: **For then shall be great tribulation, such as was not since the beginning of the world to this time, no, nor ever shall be.** And except those days should be shortened, there should no flesh be saved: but for the elect's sake those days shall be shortened.*

(Joel 3:2 [KJV])
***I will also gather all nations, and will bring them down into the valley of Jehoshaphat,** and will plead with them there for my people and for my heritage Israel, whom they have scattered among the nations, and parted my land.*

(Joel 3:9-16[KJV])
*Proclaim ye this among the Gentiles; Prepare war, wake up the mighty men, let all the men of war draw near; let them come up: Beat your plowshares into swords, and your pruninghooks into spears: let the weak say, I am strong. Assemble yourselves, and come, all ye heathen, and gather yourselves together round about: thither cause thy mighty ones to come down, O LORD. Let the heathen be wakened, **and come up to the valley of Jehoshaphat: for there will I sit to judge all the heathen round about.** Put ye in the sickle, for the harvest is ripe: come, get you down; for the press is full, the fats overflow; for their wickedness is great. **Multitudes, multitudes in the valley of decision: for the day of the LORD is near in the valley of decision.** The sun and the moon shall be darkened, and the stars shall withdraw their shining. The LORD also shall roar out of Zion, and utter his voice from Jerusalem; and the heavens and the earth shall shake: but the LORD will be the hope of his people, and the strength of the children of Israel.*

The city and tower of Babel are the post-flood revivals of idolatry from the pre-flood world. This can be shown by the subsequent building of ziggurats as temples to idols throughout Mesopotamia. The use of base 60 math in the Mesopotamian world can be proven to have continued only in Mesopotamia after the confusion of languages at the tower of Babel. The people who left Mesopotamia eventually adopted base 10 math and in the case of the Mayans, base 20 math.

The age of the gentiles begins at Babel. God will allow these nations to go their own way, as He did with the antediluvian world, until their evil hearts reach fruition. Man's original sin of wanting to be like God continues to grow until the **man of sin** is revealed, a man *Who opposeth and exalteth himself above all that is called God, or that is worshipped; so that he as God sitteth in the temple of God, shewing himself that he is God.*

In the next section, I will show the connection of base 60 math to Babylon. And the connection of Babylon to the time of Jacob's trouble. And how the connection between 666 and base 60 math in an arrow pointing straight at Babylon.
